

Applications

Particularly elegant handrails with an aluminium finish (satin silver anodised) and curved, unobtrusive brackets. They are ideal for all buildings open to the public: corridors and stairways in retirement homes, schools, hotels, residential apartment buildings, offices, etc. Escort can be bent for curved sections. A removeable system is available to provide continuation of the handrail in front of service ducts. They are fitted with bactericidal joints

Specification

- Description: Round satin silver anodised aluminium or wood effect handrail with a diameter of 40 mm

The satin silver anodised aluminium profile comprises a groove into which brackets, accessories and matching closer slide and lock. Perforated brackets are curved, 40 mm deep and made of satin silver anodised aluminium. Overall projection and depth are 80 mm. Accessories made of smooth silver finish, chromium look or wood effect PVC (wall returns, external and internal 90° angle pieces or made-to-measure from 90° to 165°, slope links) are fitted on the

profile and fixed with locking screws.

Bactericidal joints are provided for the junctions between profile sections and accessories. The profiles can be curved.

No heavy metals are used in its manufacture and the calcium-zinc thermal stabilisation process is used.

- Installation sequence: Upper edge of section 0.90 m max. above floor level. Fixes to 2-point self-locking perforated aluminium brackets at 1.20 m centres (0.80 m centres in heavy traffic areas and on light partitions like plasterboard).
