ALL-GRIP ANTISLIP COVERSTRIP BLACK 50MM 2.40M

MATERIAL

Made in sturdy glass fibres.
SRT slip resistance tester (pendulum) as per standard EN 14321 - Wet floor: 65 - Dry floor: 85 (Proven risk if <35).

FITTING MODE

Drilled. Strips are drilled 14 holes and appropriate screws to be ordered separately.
Can be cut with a diamond disc.
When installing the product, you must at least wear standard personal protective equipment. You must therefore wear a dust mask (or similar mask), safety glasses, gloves very resistant and a combination. If necessary, you can cut the product with a diamond blade but in a well-ventilated area or near extraction decks.
You can dispose of dust residues by using normal waste disposal methods. Any special permission or license is not required.
