● WHY INSTALL ENTRANCE MATTING?

DUST and MOISTURE BARRIER. TO REDUCE MAINTENANCE COST.
ROMUS ENTRY CLEAN combinable entrance mats were designed with one single aim: to stop dust and moisture brought in on visitor's shoes as effectively as possible, and thus prevent soiling and premature wear of indoor flooring.

BEFORE

In compliance with
the accessibility
standards regarding
Access to Public
Buildings

AFTER

HYGIENIC:

Retained dust does not penetrate deep into the mat like in the case of sisal-type brush mats. For this reason, these mats can be cleaned easily and regularly.

ATTRACTIVE:

They match perfectly with your entrance hall decor.

FLOOR PROTECTION AROUND THE MATWELL:

They retain dust (which can otherwise be abrasive for tiles, parquet, carpets, etc.) as well as moisture brought in on visitor's shoes.

RIGID AND ANTI-SLIP:

They are specially adapted to frequent and heavy traffic, are suitable for wheelchairs and reduce fall and slip risk.

LONG LIFE:

The cost of a mat is rapidly amortised considering its long life, especially if it is regularly maintained.
