

### DATA SHEET

#### DESCRIPTIF

Skirting board adhesive tape with polyester scrim. This product is a double sided, multifunctional adhesive tape.

Dimensions : 35 mm x 50 m  
Grammage 450g/m<sup>2</sup>

#### USE

For gluing rigid PVC skirtings, or protections mats. Allows you to compensate for wall irregularities.

#### TECHNICAL DATA

|                               |                                                    |
|-------------------------------|----------------------------------------------------|
| Adhesive carrier              | Polyester scrim                                    |
| Adhesive system               | Acrylic dispersion                                 |
| Liner                         | Silicon paper, brown                               |
| Thickness (without liner)     | 0.44 – 0.46 mm                                     |
| Peel adhesion                 | ≥ 30 N/25 mm<br>(DIN EN 1939)*                     |
| Shear adhesion                | 500 g/625 mm <sup>2</sup><br>(DIN EN 1943)*        |
| Processing temperature        | +5 °C à +30 °C                                     |
| Temperature resistance        | -20 °C à +80 °C                                    |
| Condensation water resistance | High                                               |
| Ageing resistance             | High                                               |
| Plasticizer resistance        | High                                               |
| Shelf life                    | UV-protected, dry,<br>room temperature<br>(+23 °C) |

TAPE 35MM X 50M

#### MATERIAL

This adhesive film is a highly effective adhesive material from solvent-free and aging resistant polyacrylat with balanced characteristics for adhesive strength and shear strength. A polyester scrim serves as stabilization system.

Polyester fabric support, silicon paper. Peeling DIN EN 1939 > 30N/ 25 mm. Shearing DIN EN 1943 500 g/625 mm<sup>2</sup>.

\*The values are based on the applicable norms regarding the testing of adhesive tapes.
